December 2017 News - Future Skills Centre

Schools Event

On Thursday 7th December, a number of local Year 10 & 11 school pupils and various employers and organisations were invited to the FSC. Pupils were given a presentation regarding the FSC and were then involved in a practical activity, where they were taught some basic carpentry techniques by current FSC students. Pupils were then able to question employers about training and career opportunities within their organisation.

Bordon Site Visit

In the early part of December, students from the FSC were able to visit a new care home facility being built by Mountjoy in the heart of Bordon. Students were provided with an overview of the build by the project manager, then given a tour of the various parts of the site.

The building is to be occupied and managed by Omega Elifar Ltd who provide specialist care for people with learning disabilities in Hampshire and Surrey.
