FSC attends Waverley Federation Careers event

On Tuesday 29 January, Godalming College hosted a careers event for schools within the Waverley Federation which included Glebelands, Rodborough, Broadwater and Amery Hill. The Future Skills Centre (FSC) attended in collaboration with Taylor Wimpey, Morgan Sindall and Skanska. The event provided a platform for FSC Manager, Steve Gilder, to present to a number of Year 11 pupils, whilst the employers were on hand to highlight the genuine career opportunities within their respective companies.

Students see construction in action in Bordon

Whilst visiting the Prince Phillip Barracks, full time students were given an overview on the projects progression, which included a tour of the retail park and the new Duke's Quarter housing complex.

Taylor Wimpey apprentices reach 6-month mark

Our Taylor Wimpey bricklaying apprentices are fast approaching their '6 months of training' milestone. The apprentices have been able to use their new skills involving brick and block returns and cavity wall construction, learnt at the FSC and on site, to progress with the construction of a specified detached house within the WBR development. Apprentice Declan Howick said: "I feel the training is going really well and I'm learning the right skills that will enable me to become a fully qualified bricklayer in the future".
