

**FUTURE SKILLS  
CENTRE**

## Spring 2019 Newsletter

Looking to the future

As we move into the final term of the academic year, thoughts are starting to focus on September 2019. We have had a very productive second year to date at the Future Skills Centre (FSC) and continue to go from strength to strength in regards to student success and progression, and our involvement with employers through apprenticeships and with the local community.

For the 2019/20 academic year, we are planning to expand our established provision, which contains carpentry and brickwork, to include plumbing, electrical installation and Level 3 apprenticeships in Construction and the Built Environment.

We still have limited spaces on some courses at the FSC, and are still accepting further applications. For more information, and to apply for September 2019, visit [bcot.ac.uk/bordonfsc](http://bcot.ac.uk/bordonfsc).
