2021/22 Applications

The current pandemic has not prevented Head of Construction: Steve Gilder from communicating his message to potential 2021/22 applicants from the local community and schools. Please find his latest presentation at: youtu.be/BTOqL-noamE

Record Numbers of Fulltime Students

Great news, more fulltime students at the FSC than ever before! We have introduced a L2 'Multi-skills' course which gives students a basic understanding of a number of construction disciplines. This may lead onto a higher-level course or onto an apprenticeship in 2021.

Apprentices Making Improvements

Over recent weeks, FSC and BCoT apprentices have been busy constructing a new shelter to house our mortar mixer. This will free up internal space for our Brick apprentices. The first stage was constructing a timber frame; second stage will be constructing the support wall.
