

## Greenhouse gas emissions and energy use data for the period 1 August 2019 to 31 July 2020

	2019/20
<b>Energy consumption used to calculate emissions (kWh)</b>	
<b>Energy breakdown (kWh)</b>	
Gas	1,227,167
Electricity	936,325
Transport Fuel	139,888
<b>Scope 1 emissions in metric tonnes CO2 equivalent</b>	
Gas consumption	226
Owned transport	5
<b>Total scope 1</b>	<u>231</u>
<b>Scope 2 emissions in metric tonnes CO2 equivalent</b>	
Purchased electricity	<u>218</u>
<b>Scope 3 emissions in metric tonnes CO2 equivalent</b>	
Business travel in employees owned vehicles	<u>34</u>
<b>Total gross emissions in metric tonnes CO2 equivalent</b>	<u>483</u>
<b>Intensity ratio</b>	
Tonnes of CO2 equivalent per staff member	<u>1.22</u>

### Notes regarding the emissions calculations:

#### Qualification and Reporting Methodology

We have followed the 2019 HM Government Environmental Reporting Guidelines. We have also used the GHG Reporting Protocol - Corporate Standard and have used the 2020 UK Government's Conversion Factors for Company Reporting.

#### Intensity measurement

The chosen intensity measurement ratio is total gross emissions in metric tonnes per staff member, the recommended ratio for the sector. Staff numbers comprise those employed by the college and its subsidiary company, BCoT Professional Services Limited, in order to provide a meaningful and comparable measure.

#### Measures taken to improve energy efficiency

The college has a 400 panel solar pv installation. Investment has been made in LED lighting over a number of years. Building improvements have improved thermal insulation and reduced heating demand. Staff and students are actively engaged in discussions and generate ideas to reduce energy consumption and harmful waste.

#### The impact of COVID-19

2019/20 was not been a typical year of operation due the COVID-19 lockdown measures necessitating the college to close from March to July 2020. During this period power consumption and transport mileage fell well below usual levels.
